

[Inauguration of Large Valve machining facility at KML, Tumkur Plant.](#)

Machining cell for large valves was inaugurated by our Chairman, Mr. L Ganesh on 11.03.2014. KML has envisioned business growth through large valves which is a niche market. Currently KML makes valves up to 360 mm in length. This machining line is capable of handling valves of up to 1 meter length – for applications in Power Generation, Locomotive and Marine Segments. Customers in this segment could include Caterpillar, General Electric, MAN Diesels, Rolls Royce, Wartsila, Waukesha etc. The cell consists primarily of Centerless grinders, CNC turning centers and few SPMs.
