The medium and large valve division, which came into fold after amalgamation of KML, made a profit before tax of Rs. 0.34 crores compared to a profit before tax of Rs. 2.07 crores last year.

Operations and Manufacturing Review:

Your company has invested in R&D in terms of enhancing design and validation capability and process technology. This will continue in the coming years as well, in-line with its vision to be a 'solution provider' to its customers' needs. This enables the company to delight customers with its products and solutions and become the preferred solution provider.

The newer emission norms & power increase demand higher temperature resistance material. The focus is on high performance materials and special surface coating. The Company developed valves for Euro 6 application and CNG for European and Indian customers.

Further, with proliferation of CNG engines in India, the Company has developed and launched products suitable for CNG requirements. This necessitates a greater R&D capability to address better wear and tear characteristics, as CNG is a corrosive fuel.

Your Company continues to focus on new business growth; the sales from new business is Rs 73.47 crores. Increased new order booking will enable the company to increase its sales in the coming years.

Various cost reduction initiatives undertaken during last year continued this year also.

Some of the key initiatives are as follows:

- i) Continuous improvement in existing processes
- ii) Implementation of Robot & Automation. Focus is to modernise and improve the plant performance and is expected to pay-off in the next couple of years.
- iii) The benefit of consolidation of plants has been sustained this year too.
- iv) Your Company continues its good performance on quality with a rejection level less than 10 PPM. The quality system accreditations are:
 - All plants are recertified for ISO/TS 16949: 2009 which reinforces the robustness of quality system
 - 3 plants are re-certified for ISO 14001:2004 which demonstrates the continued focus on environment protection

Outlook

The market sentiments are looking positive on formation of stable government; however growth is likely from the second half of 2015-16. The Company is closely monitoring the specific initiatives taken by the government for promoting industrial growth.

Being a domestic market leader and with focus towards enhancing market share, strategy is directed towards cost effective technology/product development to meet the demands of new launches of OEMs. The Company would continuously develop and leverage its R&D strengths to ensure "future ready" technology for applications in new generation vehicles.

Opportunities & Threats

Given the positive industrial climate, the growth of Indian economy is expected to improve to 7.5% of GDP. This could mean recovery and growth in Automobile Industry. This will happen if the infrastructure issues like power, roads and ports are addressed and some flexibility in employment is enabled through labour reforms.

While the strengths / competitive advantages of the Company are essentially in market leadership and brand equity, the Company is focusing on enhancing its technology base, product range and process technologies to leverage with key customers and thus become a strategic partner. Towards this, a technology road map has been prepared and the Company is constantly upgrading and expanding its R&D infrastructure into a comprehensive R&D centre which will include design, testing and validation facilities and engineering competence.

The Company's strength continues in the areas of :

- EVL / Group brand name
- Product design and validation capability – ability to propose alternate design to customers
- In-house machine building capability – ability to build customized equipment.
- Potential to leverage group presence across customers
- Diversified segment presence (2W – MHCV; now enhanced to construction, marine and railway applications with the merger of KML into REVL)
- Multi Plant location (offers option of more than one plant option as a de- risk measure)
- Goodwill of the stakeholders towards company

The main threats to which auto component industry is exposed to are :

- Increased competitive pressure – price
- Entry of ASEAN & Korean suppliers (FTA Agreement), in addition to sourcing from China
- Obsolescence of CI guides, Chill cast iron tappets (PC)
- Unutilized manufacturing capacity globally (Valves); moving spare capacities to India
- OEMs aggressively focusing on spares Market

The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value.
- 1.2 The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include allowance for uncollectible accounts receivables, future obligations under employees benefit plans, useful life of depreciable fixed assets, accounting for employee cost pending execution of agreements with workmen unions etc. Actual results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognised in the period in which the results are known / materialise.

1.3 Fixed Assets, Impairment & Depreciation

Fixed assets are stated at cost. None of the fixed assets has been revalued. Expenses incurred in connection with project prior to the commencement of commercial production are treated as part of project cost and capitalised as part of fixed assets.

If an asset is carried at a value more than the recoverable amount through use or sale of the asset, such impairment of asset is recognized as expenditure of the year. If such impairment ceases to exist then the same is recognized as income of that year.

- 1.4 In respect of fixed assets (other than freehold land and capital work-in-progress) acquired during the year, depreciation / amortisation is charged on a straight line basis so as to write off the cost of the assets over the useful lives and for the assets acquired prior to April 1, 2014 is depreciated over the remaining useful life based on evaluation.

Foreign currency monetary assets and liabilities are translated at year end exchange rates. Exchange differences arising on settlement and translation of monetary items other than for acquisition of fixed assets, at the year end are recognised as income or expense in the year in which they arise.

Premium or discount on forward / option contracts is amortised over the life of such contracts and is recognised as income or expense in the Profit and Loss account.

Exchange differences arising on settlement / translation of long term monetary items utilized for acquisition of fixed assets are adjusted to carrying cost of fixed assets.
