

Can we capture more carbon?

A ₹20,000 crore outlay in the Budget may help speed up commercial-scale carbon capture, utilisation and storage projects as India balances industrial growth with Net Zero goal

SUDHEER PAL SINGH & NANDINI KESHARI
New Delhi, 23 February

After years of interventions, debate and regulatory road maps, India may finally be close to entering the growth phase of Carbon Capture, Utilisation and Storage (CCUS), marked by the implementation of commercial-scale projects to reduce the carbon footprint of high-emission industries.

Despite India's per capita emissions being only 1.9 tonnes per annum — about 40 per cent of the global average and one-fourth of China — CCUS technology is critical as a decarbonisation solution for sectors that contribute more than 70 per cent to the country's emissions. That, in turn, is linked to the larger national goal of achieving Net Zero by 2070 while maintaining industrial competitiveness in the face of global carbon regulations.

As part of that effort, the Budget for 2026-27, presented on February 1, announced a ₹20,000 crore outlay for CCUS over the next five years, fueling hopes of specific action soon.

"Over the next five years, a realistic expectation of CCUS capacity creation would be between 10 million tonnes and 15 mt, possibly up to 20 mt if projects move efficiently. Even achieving 10 mt would be a strong start. Over a few million-tonne scale projects are operational, replication becomes much easier," said Atanu Mukherjee, chief executive officer of energy consultancy firm M N Datar. "From an investment perspective, this would require roughly ₹15,000 crore over the next five years — to support 4-6 carbon capture and storage projects in hard-to-abate sectors, delivering close to 10 mt of capacity," he added, referring to industries such as steel, aluminium and fertilisers.

The firm has written a report titled CCUS Policy Framework and its Deployment Mechanism in India for the NITI Aayog, the government's policy think tank, and is working on a few commercial-scale domestic CCUS projects, including the value chain design for Indian Oil Corporation Ltd (IOCL) refineries, in collabora-

tion with the Asian Development Bank.

Catalytic signal

As a catalyst, at least 5-6 projects across hard-to-abate sectors in high-emission states need support through capital allocation mechanisms that enable capture, transportation, storage, and conversion. This is expected to send a strong catalytic signal and help shift the focus from small pilots and research & development (R&D) testbeds to sustained, commercial-scale operations, the report said. For CCUS to achieve broad adoption, the technology needs to operate at a meaningful commercial scale in sectors that contribute the most to carbon emissions.

"The priority now should be on the invention of entirely new concepts, as CCUS is built on technologies that have been proven for decades," said Mukherjee. "The real opportunity lies in applied research and innovation that have a multiplier impact on economics and scale — smarter system integration, better process design, modularisation, materials optimisation, digital monitoring, and operational efficiency jumps. Leapfrogging in these areas will be critical to driving down costs, improving reliability, and enabling deployment at an increasingly larger scale."

Besides the focus on R&D and innovation, rapid deployment of CCUS project capacity will require getting it right in three other areas. First, policy planners need to focus on the storage aspect of the CCUS value chain. While India has significant storage capacity, it requires detailed exploration and adequate budgetary support so that demonstration and commercial projects can move forward. Second, CCUS must be linked to evolving carbon markets and carbon trading systems, which will help price carbon dioxide and drive decisions around capture, transport and storage. Finally, for it to scale, CCUS must become an infrastructure utility. This means moving towards shared infrastructure models for carbon transportation and storage, similar to water utilities and electricity grids.

"The starting point will be demonstration pro-

Green pathway

- Move towards commercial-scale CCUS backed by ₹20,000 crore Budget allocation
- Build 10-15 mt CCUS capacity over 5 years for 4-6 large projects in hard-to-abate industries
- Expand storage, link CCUS to carbon markets, build shared transport and storage infrastructure, enable affordable financing
- Pilots already launched involving NTPC, IOCL, and Tata Steel

Success will depend on clear incentives, global technology partnerships, and sustained investment

jects or large, commercial-scale projects anchored through the proposed ₹20,000 crore support. These would act as anchor projects across different sectors. However, for CCUS to truly scale, the infrastructure needs to be financed — including pipelines, storage facilities, and capture equipment — and it needs to be financed at attractive rates. We have proposed the creation of a Carbon Capture Finance Corporation, which would leverage sovereign support to lower the cost of capital. Because these are carbon-related investments, instruments such as carbon bonds or green bonds, backed by sovereign support, can significantly lower financing costs," Mukherjee said.

Fast tracking investment

Other experts believe the budgetary allocation for building CCUS infrastructure is a welcome move, particularly for sectors like power, steel, cement, refineries, and chemicals. "However, the specific incentive mechanism structure and global technology collaborations would be key monuments to fast-track investments in this space," said Pranav Master, senior practice leader and direc-

tor, Crisil Intelligence. Globally, operational plants capture carbon in a range between 1 mt and 2 mt per annum. The ExxonMobil Shute Creek facility in the US, the world's largest, operates at 6.7 mtpa capacity. From a cost perspective, the IOCL refinery project has one of the lowest capture costs at scale, at around \$20 or ₹2,500 per tonne, according to Mukherjee. Broadly, the capex required for setting up CCUS projects depends on the sector and the nature of emissions. In India, setting up 1 mt per annum of carbon capture capacity is likely to require around ₹900 crore-₹1,000 crore. This can be lower in some cases, such as coal gasification, and higher in others.

On the domestic front, NTPC commissioned a 20 tonne per day (TPD) carbon capture plant in 2022, which converts carbon to methanol at its Vinayachandrar power station. Oil and Natural Gas Corporation (ONGC) also recently announced a CCUS pilot at its Gandhar oilfield in Gujarat. The project will capture carbon from nearby industrial units in the Dabeh region and ONGC's Hazira plant and inject around 100 TPD of carbon into two depleted oil reservoir wells for underground stor-

age. It will also test the use of carbon dioxide for enhanced oil recovery (EOR). In 2021, Tata Steel commissioned a 5 TPD CCUS pilot at its Jamshedpur plant to capture carbon from the blast furnace. Similarly, JSW Steel is operating a 100 TPD CCUS facility at its Durgam chhat reduced iron (DRI) plant, where captured carbon is refined for use in the food and beverage industry.

Meagre capture

Despite the recent momentum, some experts believe there is still a long way to go before CCUS is deployed rapidly. According to energy think-tank Ember, annual global carbon emissions stand at 38.6 billion tonnes but all the operational CCUS facilities across the world have captured less than 50 mt of carbon annually, which translates into a meagre 0.13 per cent of global emissions.

"Although the technology readiness level (TRL) is high for many capture, conversion and geological sequestration options, India has not really tried it at scale. The country needs to find suitable technologies, including a regulatory model or framework with government support," said Vikram Vishal, convener, National Centre of Excellence in Carbon Capture & Utilisation (NCoE-CCU), Indian Institute of Technology (IIT) Bombay.

Highlighting the urgency of developing technologies like CCUS, the NITI Aayog said in a report earlier this month that the central challenge before India on its development journey is to strike a balance between the Viksit Bharat agenda, which envisions increasing GDP to \$30 trillion by 2047, and achieving Net Zero greenhouse gas emissions by 2070.

1. Notice is hereby given that pursuant to the provisions of Sections 108 and 110 of the Companies Act, 2013 ("the Act"), read with Rules 20 and 22 of the Companies (Management and Administration) Rules, 2014 ("the Rules"), Secretarial Standard-2 on General Meetings issued by the Institute of Company Secretaries of India (ICSI), Regulation 44 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, the guidelines and circulars issued by the Ministry of Corporate Affairs ("MCA") and other applicable laws, rules and regulations, as amended from time to time, including any statutory modification(s) or re-enactment thereof for the time being in force, Krypton Industries Limited ("the Company") seeks the approval of its Members by way of Special Resolution for the below Resolutions through the Postal Ballot, Proxy Process conducted by way of Remote E-Voting, thereby enabling the Members to cast their votes electronically.

i) Regulation of MCA Circulars as Non-Executive Independent Director (DIN: 07276232) of the Company
ii) Approval of remuneration to Mr. Digvijay Singh Bardia, (DIN: 10220855) Whole Time Director of the Company exceeding the limits prescribed under Sections 196, 197 and other applicable provisions of the Companies Act, 2013 read with Schedule V thereof.

2. The Notice of the Postal Ballot has been sent through electronic mode on 10th February, 2026 to those members, whose email addresses are registered with Company or with the Company's Registrar and Share Transfer Agent, namely, Maharashtra Datanatics Private Limited (RTA) or with their respective Depositories Participant (Depository) is on the cut-off date of Saturday, 21st February, 2026, may cast their votes electronically as set out in the Notice of the Postal Ballot through remote e-voting of CDSC. The Voting rights of shareholders shall be in proportion to the number of equity shares held by them as on the cut-off date. The remote e-voting module shall be disabled by CDSC, thereafter.

3. In compliance with MCA Circular, the Company has provided only remote e-voting facility to its members, to enable them to cast their votes electronically instead of submitting a physical copy of the Postal Ballot Form. The communication of the Members would take place only through remote e-voting system. For this purpose, the Company has entered into an agreement with Central Depository Services Limited (CDSL) for enabling remote e-voting process. Members may cast their votes electronically only.

4. The detailed procedure and instructions for remote e-voting are enumerated in the Postal Ballot Form. The remote e-voting period shall commence on Tuesday, 24th February, 2026 at 09:00 AM (IST) and shall end on Wednesday, 25th March, 2026 at 03:00 PM (IST). During this period, Members of the Company whose name appears in the Register of Members as on the cut-off date of Saturday, 21st February, 2026, may cast their votes electronically as set out in the Notice of the Postal Ballot through remote e-voting of CDSC. The Voting rights of shareholders shall be in proportion to the number of equity shares held by them as on the cut-off date. The remote e-voting module shall be disabled by CDSC, for voting thereafter. Once the vote on a resolution is cast by a shareholder, shall not be allowed to change it thereafter. A person who has not a shareholder as on the cut-off date shall not be allowed to vote on a resolution purpose only. In case of joint holders, only such joint holder who is higher in the order of names will be entitled to cast a voting on the resolution.

5. In line with the MCA Circular and SEBI circular, the Notice of the Postal Ballot of the Company has been uploaded on the website of the Company at www.krypton.com and the notice of the postal ballot of the Company can also be accessed from the website of the stock exchange, namely, Katta Stock Exchange (KSE) and Bombay Stock Exchange (BSE) and is also available on the website of CDSC.

6. Members holding shares in physical form and whose email addresses are not registered with the Company are requested to register their email address by filling up a signed request letter along with a scanned copy of their Photo Number, self-attested PAN, and any self-attested document such as Aadhaar Card, Register of Driving License, to the Company's Registrar and Share Transfer Agent (RTA) (the Company at paragon@indprocorp.com), to enable receipt of the Postal Ballot Notice and to participate in the Remote E-Voting process. Upon successful registration, email addresses, the Company shall send the Postal Ballot Notice and e-voting instructions to such Members.

7. For any further assistance, Members may also contact Mr. Priya Agarwal, Company Secretary, Krypton Industries Limited, at telephone No. 033-2287-1356/1367 or at email id - cs@krypton.com.

Capital Small Finance Bank Limited

Members are hereby informed that pursuant to Section 108, 110 and other applicable provisions, if any, of the Companies Act, 2013 ("Act"), read with Rule 20 and 22 of the Companies (Management and Administration) Rules, 2014, Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations"), Secretarial Standard on General Meetings ("SSG") issued by Institute of Company Secretaries of India, General Circular No. 3/2025 dated September 22, 2025 read with circulars issued earlier by Ministry of Corporate Affairs on the subject ("MCA Circulars") and other applicable rules/regulations/guidelines (including notification, including a regulatory notification or enactment thereof for the time being in force, Capital Small Finance Bank Limited ("CSFB") is seeking approval of Members of the Bank, through Postal Ballot, by way of remote electronic mode ("e-voting") on special business as mentioned in the Postal Ballot Notice dated January 29, 2026.

In compliance of MCA Circulars, the Postal Ballot Notice together with explanatory statement and instructions for e-voting has been sent on Monday, February 23, 2026 by email to all the Members, whose email IDs are registered with the Bank's Depository Participant (Registrar and Share Transfer Agent) MUFG Intime India Private Limited (Formerly Link Intime India Private Limited).

The Postal Ballot Notice is available on the Bank's website (www.capitalbank.in) and on the website of MUFG Intime India Private Limited (https://investorlinkintime.com). The details are also available on the website of the Registrar and Share Transfer Agent (RTA) i.e. the Institute of Company Secretaries of India, BSE Limited ("BSE") (www.bseindia.com) and National Stock Exchange of India Limited ("NSE") (www.nseindia.com).

In compliance with provisions of Section 108 and 110 of the Act read with Rule 20 and 22 of the Companies (Management and Administration) Rules, 2014 and Regulation 44 of the Listing Regulations, the Bank is offering remote e-voting facility to the Members of the Bank holding shares as on Friday, February 20, 2026 to enable them to cast their votes using e-voting, for which the Bank has engaged the services of MUFG Intime India Private Limited as e-voting agency.

The e-voting shall commence on Tuesday, February 24, 2026 at 9:00 a.m. (IST) and end on Wednesday, March 25, 2026 at 5:00 p.m. (IST). Members may cast their vote electronically during the aforesaid period. The e-voting module shall be disabled at 5:00 p.m. (IST) on Wednesday, March 25, 2026 and e-voting shall not be allowed beyond the same. Members whose names appeared on the Register of Members/ List of Beneficial Owners as on Friday, February 20, 2026 i.e. the cut-off date, will be considered eligible for the purpose of e-voting. A person who is not a Member as on cut-off date for reckoning voting rights, should treat this Notice for information purposes only. In accordance with the above mentioned Circular, Postal Ballot Form and Business Reply Envelopes of the Members will be sent to the Members. The communication of the assent or dissent of the Members will take place through the e-voting system only. The instructions of the Members for e-voting are mentioned in the Postal Ballot Notice. The Members are requested to register their e-mail address in respect of demat holdings with their respective Depository Participant by the procedure prescribed by the Depository Participant.

The Members holding shares in physical mode and who have not registered/updated their e-mail addresses with the Bank are requested to update the same by submitting a duly filled and signed form (SRF) alongwith self attested copy of PAN and any Address Proof to RTA at rtat@capitalbank.in or on the website of MUFG Intime India Private Limited (https://investorlinkintime.com) and on the website of MUFG Intime India Private Limited (https://investorlinkintime.com) and on the website of MUFG Intime India Private Limited (https://investorlinkintime.com) and on the website of Stock Exchanges where the Bank's shares are listed (i.e., BSE Limited ("BSE") (www.bseindia.com) and National Stock Exchange of India Ltd, (NSE) (www.nseindia.com)) for the information of Members. Members who have not received the Postal Ballot Notice may write to the Bank at its registered office or to the Registrar and Transfer Agent to obtain the same or download it from the Bank's website (www.capitalbank.in) or from the website of MUFG Intime India Private Limited (https://investorlinkintime.com) or from the website of MUFG Intime India Private Limited (https://investorlinkintime.com).
